

Fire Safety Awareness

Learning summary	This learning covers the principles of fire safety including the impact of fire in the workplace and the risks within a healthcare setting.
Learning aims	The aim of this learning is to provide an awareness of the principles of fire prevention and protection. This learning will explore what hazards can pose a fire risk and the causes of fire. The learning also examines the types of fire detection systems and what you need to consider when escaping from a building/workplace.
Learning objectives	Learners will be able to: • Identify fire safety legislation • Recognise fire hazards and how to prevent fire • Define the nature and causes of fire • Understand the behaviour of fire and the risk of fire spread within buildings • Understand how people and buildings are protected from fire and our legal duty to protect ourselves and others • To know how to respond if a fire is discovered, how to respond to a fire alarm and how to safely attack a small fire • Describe staff evacuation principles • Identify the location of extinguishers and escape routes • Provide an overview of the management of fire safety • Describe passive and active fire precautions

Applicable audiences	This learning is suitable for all learners				
Pre-requisites	There are no pre-requisites required for this learning				
Delivery method	This learning is delivered by a virtual classroom				
Duration	This learning will take 2 hours to complete				
Materials and resources required	Learners should have access to a computer with an internet connection and Microsoft Teams				
Refresher	It is recommended that this learning should be completed yearly				
Minimum learners required	4	Maximum learners required	12	CPD points	N/A
