

Infection Prevention and Control Tier 1

Learning summary

This learning provides a comprehensive programme designed for all learners, providing essential knowledge and skills to prevent and manage infections in diverse settings. Participants gain insights into best practices, hygiene protocols and effective measures to safeguard public health.

Learning aims

The aim of this learning is to raise awareness of how to prevent and manage infections.

Learning objectives

Learners will be able to:

- Define how infections can be spread from person-to-person
- Explore the practice of good hand hygiene and the effect this can have on preventing the spread of bacteria
- Recall the process of correctly putting on and removing personal protective equipment
- Explore the methods of correctly disposing of clinical waste
- Examine how to correctly collect, handle and label specimens
- Articulate your responsibility when it comes to cleaning and decontaminating
